

SIoux COUNTY TOWNSHIPS

Sioux County is very irregular, compared to most counties, with Cannonball River and Cedar Creek forming the north county line, and the Missouri River forming the east county line. Because of this, the townships do not include the normal 36 Sections. The list below, compiled by Mike Peterson (geanie@cox.net) in August 2015, attempts to document the Sections for each of the Townships in Sioux County. The Townships and Ranges are listed from the north to south then east to the west. Townships range from 129 to 134, Ranges range from 79 to 90; standard Townships have 36 Sections. The latest dated names for any of the Townships come from the 1940 U. S. Federal Census.
